

Component Program

```
1 package com.example.component;
2
3 > import ...
4
5
6
7 @SpringBootApplication
8 ▶ public class ComponentApplication {
9
10 ▶     public static void main(String[] args) {
11         ApplicationContext context = SpringApplication.run(ComponentApplication.class, args);
12         component com = context.getBean(component.class);
13         com.display();|
14     }
15
16 }
17
```

```
1 package com.example.component;
2
3 import org.springframework.stereotype.Component;
4 ⚡
5 @Component
6
7 public class component {
8     public void display(){ no usages
9         System.out.println("hello world");
10     }
11 }
12
```

Output

```
hello world
```

```
Process finished with exit code 0
```
